FoodMaps Useability Test Instructions

Thanks for participating in this test!

In order to conduct the test please follow these instructions:

1. Download the zip file that I have sent to you on Microsoft teams, and run the react project that it contains. Run "npm install" followed by "npm start"
2. Please record your screen and perform the following tasks. If comfortable, also record your thoughts as you work through the tasks:
   a. Task Scenario 1 - Click on an event and view it in detailed view. Repeat this for 3 separate events.
   b. Task Scenario 2 - Click on an event and click "Add to Saved", and then go to the "Saved Events" tab and confirm that the event is there.
   c. Delete an event from the "Saved Events" tab
3. Send me your video recording via Microsoft Teams, and also answer the following questions in a chat:
   a. What parts of the interface were the most/least intuitive?
   b. Was the layout good for the purpose of the application
   c. Was there anything you thought was particularly confusing about the application?
